

Towards Safer Therapies

In the heart of the science and business location Heidelberg, GeneWerk GmbH has found ideal conditions for steady growth. For six years, the company with its experienced and motivated staff has been offering NGS-based molecular biological analysis services, especially for companies in the pharmaceutical, life sciences and biotechnology industries. The aim is to advance the development of innovative therapies such as gene and immunotherapies through comprehensive safety analyses. Safe and effective therapies are thus within reach for many diseases. With the help of the investor Ampersand Capital Partners, GeneWerk will push ahead with its expansion in the USA in order to better serve the rapidly growing American market. We are looking for a dedicated individual to join a great team as soon as possible in Heidelberg:.

Project Manager (m/f/d) in Life Science

Molecular Biology, Next Generation Sequencing, Data Analysis

Your Job Responsibilities

Our service is based on molecular analyses of DNA and RNA combined with Next Generation Sequencing (NGS). Our worldwide customers are pharmaceutical companies that value the highest quality standards. As a member of the project management team your tasks are in detail:

- Independent processing of customer projects according to GCP/GLP/GCLP principles;
- Preparation of project plans, coordination of molecular biological analyses, data analyses, interpretation of results, preparation of customer reports;
- Interaction with our worldwide customers;
- Support in setting up documents for Good Clinical and Laboratory Practice (GCLP);
- Independent electronic documentation of processes and work steps according to our quality management standards.

Your Qualifications

- Successfully completed scientific-technical master's degree in the life science field (e.g. biology / biochemistry / molecular medicine) or comparable qualification;
- High flexibility and willingness to get involved in various projects;
- Scientific background in field of Gene Therapy and/or basic knowledge of bioinformatics for NGS data analysis is advantageous;
- Willingness to work according to quality management standards;
- Industry and GLP/GCP experience is advantageous;
- Pleasure in independent and responsible work in a team;
- Communication skills and ability to work in a team;
- Very good English skills for working in an international team and with international customers.

What We Offer (i.a.)

Competitive salary; 30 days annual vacation; flat hierarchies; pleasant working atmosphere; open-minded and friendly team; flexible working hours; home office according to prior agreement; job ticket possibility; professional and personal development opportunities; company pension opportunities.

We are looking forward to receiving your comprehensive application via e-mail to:
